

Q Aerosols

Product Data Sheet

Use — General Automotive Application

LUBEX

QAT Lubex is the complete product where quality is important. Latest corrosion control and lubricating technology is employed in this superior product. A versatile, safe, spray lubricant that really works. Designed for industrial and domestic application. Contains no silicones or hazardous ingredients. Will not harm plastic or rubber. Does not wash off with water and gives excellent corrosion protection to metal surfaces.

CARBY CLEANER

QAT Carby Cleaner is the perfect cleaner for all types of carburetors. Its powerful cleaning formula removes residual build ups and deposits and ensures a cleaner running engine.

BRAKE CLEANER

QAT Brake Cleaner is the perfect cleaner for all types of brakes. Its powerful cleaning formula removes road grime, oils and grease and ensures smoother and longer lasting brakes.

SILICONE SPRAY

QAT Silicone Spray is a multi use product for protecting surfaces, rubber mouldings, plastic rails, strips and seals. It prevents brittleness and promotes smooth, noise free operation of locks, hinges, sliding components. Prevents moisture build up in ignition systems and electrical contacts. Shines and protects dashboards and tyres. It has hundreds of other uses!

CHAIN LUBE

QAT Chain Lube is specifically formulated for advanced lubrication and protection properties. Ideal on motor bike chains and other applications where long lasting protection against wear are needed. Also contains an advanced water and rust protectant.

AIR INTAKE & UPPER ENGINE CLEANER

QAT Air Intake & Upper Engine Cleaner is a 100% active unique blend of solvents, detergents and dispersants designed to remove gum and varnish deposits and carbon deposits from air intake and combustion areas. It helps improve idling and economy. Also reduces exhaust emissions without the need to dismantle and clean the fuel system.
